Recommended Way of Maintenance from TOLI	<ul style="list-style-type: none"> ◆No need to apply the maintenance wax on the surface. Clean the floor every day with an auto scrubber or a wet rag wrung out tightly. Use the detergent for fixed contamination. ◆Even if the wax is applied on the surface, it does not affect the quality of NW series. ◆For a large facility, an abstergent auto scrubber is more recommendable. ◆High speed buffing should be avoided. Otherwise highly durable UV coating will be abraded.

Others	<ul style="list-style-type: none"> ◆At the entrance of the building, the dust control mat should be laid in order to avoid soils and sands from outside. ◆The dirt and stains will be more visible on the floor covering with lighter plain colors, compared to dark colors. Also they are more likely to stick with the deep-embossed surface than the flat surface. ◆Please be aware that some rubber casters might cause color-contamination. ◆Please note that the product has the indigenous odor from its materials.
