Recommended Adhesive from TOLI	TOLI ECO GA Cement			(required quantity)			for steel or plastic sub-floor			40 to 60 gram/m ²		
							for mortar and wood sub-floor			60 to 100 gram/m ²		
Notes on Installation	♦Apply the adhesive on the whole surface of the sub-floor thinly and evenly. After drying, when the adhesive becomes translucent, install the tiles. Be careful not to put the tiles too tightly.											
Others	♦In Monolithic installation, when the color difference between the tiles stands out or the joints are visible, please switch the tiles partly. ♦Please note that the product has the indigenous odor from its materials. ♦Right after installation, color shading could be seen on the floor. This is just because surface piles partially lie down. With the passage of time, it will disappear.											
Custom Order	All the standard colors of GA-100T can be made with Nano Clean finish (patent-obtained special stain release) on a made-to-order basis. For more information, please contact TOLI sales reps.
