Way of Installation	Monolithic or Quarter Turn

Recommended Adhesive from TOLI	TOLI ECO GA Cement	(required quantity)	for steel or plastic sub-floor	40 to 60 gram/m²
			for mortar and wood sub-floor	60 to 100 gram/m²

Notes on Installation	Apply the adhesive on the whole surface of the sub-floor thinly and evenly. After drying, when the adhesive becomes translucent, install the tiles. Be careful not to put the tiles too tightly.

Others	✦In Monolithic installation, when the color difference between the tiles stands out or the joints are visible, please switch the tiles partly. ✦To have a natural image after installation, stripes are intentionally inserted in the design at regular intervals, which is not a manufacturing defect. In case you do not feel comfortable about the floor after installation, please change the tiles partly so that it will look natural. ✦Please note that the product has the indigenous odor from its materials.

| Custom Order	All the standard colors of GA-100W can be made with Nano Clean finish (patent-obtained special stain release) on a made-to-order basis. For more information, please contact TOLI sales reps.
